PALLET SHEETS

Our Pallet Sheets offer a reliable, protective barrier between stacked items or between products and pallets. Designed to prevent shifting, minimize damage, and provide resistance against moisture and dust, these sheets enhance load stability and improve overall efficiency. Perfect for use in warehouses, logistics, and shipping operations, they help maintain a clean and secure environment for your products.

ANTI-SLIP PAPER

Our anti-slip papers greatly reduce the potential for product shifting during transportation, a major cause of damage in transport. This product can be placed on top of skids to unitize the load, or between layers of boxes, bags, or trays. It can be placed by hand or automation, and doesn't stick to products or leave residue.

By optimizing your pallet loads using layers sheets for stabilization, you can protect your investment and make sure it gets to where it needs to be safely.

EDGEBOARD

Racer Boxes edgeboard is commonly used for protective packaging, and to enhance shipping stability and protection. Racer Boxes stocks a wide array of sizes and lengths for immediate shipment, and also offers one or two colour print to help promote your brand. Our large inventory, along with an in house high speed cutter to cut product to custom sizes, allows us to provide an extremely high level of service.

FREEZER & MEAT WRAPS

Freezer wraps are poly-coated kraft papers that are used extensively in the food industry, especially to wrap meats. Ideal for butchers, supermarkets, caterers and meat packers. Racer stocks both natural and red freezer wrap and can also offer a bleached white freezer wrap. Standard 15 and 18 inch wide rolls plus any custom sized rolls or sheets are available. These food grade papers are specifically designed for direct food contact and come individually shrink-wrapped to maintain food safe standards. Add one or two color print for your brand recognition.

NOVASHIELD FLOOR PAPER

Our newest product is our multi layered NovaShield floor protection which combines 2 ply of natural linerboard for scratch resistance and cushioning along with a sandwiched layer of strong nylon scrim for tear strength. These layers are laminated together with a middle layer of polyethylene that provides true water and moisture hold out.

NovaShield is the perfect floor protection for painting, restoration, moving and storage and construction applications. This sturdy sheet calipers out at over 20 points thick and lays flat so it is easy to work with. Offered in standard 36 x 100 foot rolls. Add one or two colour print for brand recognition

MAIL TUBES

Whatever your needs for paper tubes and cores, Racer can help you find the right solution. We stock standard sized mail tubes for fast turn-around, and can provide custom sized cores, shipping or highly attractive packaging tubes. Let us help you design a unique package for your products. The possibilities are endless.

KRAFT PAPER

Natural Kraft paper has various applications in the packaging and food industry. Our natural Kraft contains 30 percent recycled fiber and is FDA and CFIA approved for direct food contact. We stock four different basis weights to cover the many needs for strength and flexibility, and can also offer a bleached Kraft option should you require a white wrap rather than Kraft. Add one or two color printing to advertise your company or message.

NEWSPRINT

Clean white newsprint is available in both standard and custom sized sheets and rolls. Commonly used as packing paper, void fills, and protective wrap.
